

SPECIFICATIONS PURSUANT TO CT6.74# - SLASH TREATMENT REQUIREMENTS
(02/2002)

Landings (PL)

Slash resulting from clearing operations and debris accumulated on landings that is from 1 inch in diameter up to 8 inches in diameter, or any piece exceeding 8 ft. in length will be piled, unless agreed otherwise.

Construction of landing piles: Piles shall contain little or no soil. Accumulations of soil that remain after Forest Service burning will be leveled to normal ground contour. Slash piling operations shall not unnecessarily damage young growth or other trees to be reserved. Slash piles shall be located away from residual trees and young growth to prevent damage during pile burning.

The use of tractors to pile landings on cable ground is prohibited unless agreed otherwise by the Forest Service.
